Stout, Rugged, Moderately Framed Coming Two-Year-Old Bulls
Coming Yearling Heifers & Yearling Horses

*Balanced Cattle Genetics Emphasizing Calving Ease, Reduced Maintenance Energy,
and Enhanced Stayability; Selected For Gentle Disposition*

A LITTLE ABOUT US

Our Philosophy...

We recognize that there is no “one size fits all” when it comes to seedstock. Because of this, we believe it is very important that you understand the approaches we take in our breeding program. We believe the cattle we have available for sale will work very well for many – but certainly not for all. We don’t want to simply make a sale – we want satisfied customers. It is for this reason that in the following pages, we have tried to do more than just describe the animals we have in this year’s offering.

Our Focus...

We began our purebred Red Angus herd in 1999 with the purchase of a bull and heifer. It is from that nucleus that our herd has been developed. We purchased some cows thereafter, but have maintained a closed cowherd since 2002.

Our initial focus was developing sound cattle, capable of surviving and thriving on the often limited inputs available on the High Plains. Selection pressure was applied to produce cattle with calving ease, low birth weight, and high longevity in the herd – meaning an EPD emphasis favoring high CED, low BW, and high STAY. Although not an early focus of our herd bull selections, we have also long applied pressure on maintenance energy, preferring a low ME EPD. The latter is simply a reflection of the environment in which our cattle live, and conditions to which we subject our cows. For winter rations, our cows forage stock-piled grass until mid-February, and are only fed supplemental hay from that point through calving. (In very rare instances of ice or extremely heavy snowfall, we do feed hay for brief periods before mid-February; however, those precipitation events are not common in our part of the country.) Since 2009, we have also applied selection pressure on the HPG and CEM EPDs, the results of which are now starting to become apparent.

We have emphasized these EPDs because we want a cow that will calve unassisted, forage for a significant portion of her nutritional needs, yet breed back to produce fertile progeny. In the process, we don’t overlook the other genetic traits, but we won’t pursue a high YW EPD, for example, if it were to come at the expense of any of our main areas of focus.

But there is no EPD for the most important trait for which we have selected – disposition. It is no understatement that we have been very meticulous in culling any cows which display aggression. Anyone who has had to weigh a newborn calf with the momma cow in one’s hip pocket will fully appreciate this sentiment. We have also found that quiet cows are just better for any scenario – whether it’s working them, loading them, or simply moving among them. University studies back us up on this. Flighty calves don’t gain as well in the feedlot.

We believe the selection criteria we employ will produce cattle that can survive and thrive on limited inputs.

Our Guarantee...

All bulls selling have passed a Breeding Soundness Examination within one month of sale. It is recommended that bulls be re-tested 4-6 weeks prior to breeding season. Bulls selling for \$3,500 or more are guaranteed through the first breeding season.

We strive to insure that all bulls we sell are sound breeders. However, as with any biological creature, deviations from expectations occur. We recognize that aberrations, although rare, are nonetheless part of the livestock industry. Therefore, we extend this breeding guarantee to purchasers of our bulls as a means of redressing those rare instances in which breeding expectations are not met.

1. All bulls sold are guaranteed to be breeders, with the exception of:
 - a. Bulls shown after sale by or with the permission of Buyer; in this instance, the breeding guarantee, if any, shall be as agreed upon between us and Buyer.
 - b. Negligence or willful misconduct on the part of Buyer.
 - c. Any bull shall be considered a breeder if it: (1) Settles one-third or more of the healthy cows he serves; or (2) Is the sire of 20 or more calves; or (3) Settles cows by natural service and passes a fertility test made by a competent veterinarian during any six-month period of trial.
2. All claims for refund must be delivered by Buyer to us in writing prior to January 1, 2016.
3. In the event any bull is claimed to be a non-breeder, the bull must be returned to us in good condition and complying with Kansas health requirements. We shall be entitled to three (3) months trial following the return of the bull in which to prove the bull is a breeder. If at the end of three (3) months we are unable to prove the bull is a breeder, we shall refund to Buyer the purchase price, which shall be deemed full satisfaction and settlement. Any expenses incurred for transporting a bull claimed to be a non-breeder shall be the responsibility of Buyer. If we prove the bull to be a breeder, it shall be the obligation of Buyer to take delivery of the bull and pay all expenses incurred for transportation.

THIS IS A BREEDING GUARANTEE ONLY. THIS GUARANTEE DOES NOT EXTEND TO INJURY, ILLNESS, OR DEATH. INSURANCE FOR INJURY, ILLNESS, OR DEATH IS RECOMMENDED.

**All Red Angus cattle selling
in the sale are 1A 100%.**

Dining in WaKeeney: Western Kansas Saloon, Jake & Chet's Café, Tropical Mexican Restaurant, McDonald's, Subway, Dairy Queen, Pizza Hut

Delivery: Sales aggregating over \$3500 will be shipped free of charge to a common address within 350 miles. Delivery beyond that point will be at cost.

Discount: Sales aggregating over \$3500 will be discounted \$250 if picked up day of sale.

Sale animals will be available for viewing at WaKeeney Livestock LLC any time after 1 PM on April 1, 2015.

Annual Production Sale

First Thursday of April

April 2, 2015

12 o'clock noon CDT

WaKeeney Livestock LLC

WaKeeney, Kansas

Welcome to the Inaugural Giefer Production Auction!

I certainly don't need to tell you that the cattle industry is booming and that Red Angus genetics are in the forefront of the beef industry today. Rarely do I get the chance to manage a first time auction as exciting and on track for the beef industry as the Giefer Red Angus Auction. This offering includes 12 bulls that rank in the top 5% of the breed for CED and 8 bulls that rank in the top 5% of the breed for BW EPD. If you are looking for extraordinary bulls, check out these Giefer sires with five ranking in the top 1% of the breed for CED and four ranking in the top 1% for BW! Your next herdsire should come from this exceptional set of Red Angus herd bulls selling April 2nd.

The Giefer program is dedicated to stout, easy fleshing, moderate framed cattle with top of the breed CED, BW and ME traits. It goes without saying that if you like a program's bulls, you will also like their females and this offering includes six females that rank in the top 5% for CED and 6 that rank in the top 5% for BW EPDs. I encourage you to study this catalog intently and give Bernie, Nishi, myself or any of the ringmen a call. We will represent the cattle and horses honestly and will treat your bids in complete confidence.

I will be in WaKeeney April 1st and can visually appraise the cattle if you cannot make it. Please note that you can also bid and buy online via DVAuction. I appreciate your interest in this offering and will give you an unbiased opinion of the cattle and horses.

Best Regards,

Kyle Gilchrist

Our Cows...

Every cow and heifer in our herd has been raised on our ranch. The cowherd has been closed since 2002.

Our cows are bred to calve starting May 1, when pasture (generally) begins the summer growing season. We inevitably have early calvers, so for all practical purposes our cows begin calving around April 20. There are several reasons for selecting this time of year. First, daylight lasts longer to facilitate checking cattle. Second, the weather is generally kinder for weighing and tagging newborns. Third, by calving on clean grass, we virtually eliminate the prospect of calf scours. Finally, our grasses are at greatest production in mid-June—six weeks after calving. That is key because it is then that the cow is at peak lactation and resumes her estrous cycle to re-breed. In other words, she is at the highest nutritional demand of her year, and we try to pair that with the most optimal nutritional inputs.

As our cows calve, they are transported with their calves to what will be the cows' breeding pastures. We maintain separate breeding pastures for each of our herd bulls. We turn our bulls out July 18 – no exceptions; the day is eagerly anticipated, much like a holiday! We retrieve our bulls August 29, which results in a 42 day exposure for each cow. All of our cows are bred by natural service.

We generally strive to wean our calves in mid-September to early October. At the time of weaning, our calves are fairly young – some just older than 100 days. Our calves are pre-conditioned 2 – 3 weeks prior to weaning, and we practice fence line weaning. It is at weaning that the cows are weighed, assessed a body condition score, hip height measured, dewormed, boosted (with clostridials “blackleg” and virals (BVD, BRSV, PI3, IBR), vibrio, and leptospirosis), and pregnancy checked.

About a week after weaning (as the cows begin to accept that they have been separated from their calves), we transport the cows to another part of the ranch, where they forage until late November or early December. Our cows are then moved to their winter pasture, where stockpiled pasture awaits, and where they stay until just prior to calving season. Except in the rare instance of ice or very heavy snowfall, we avoid forage supplementation until mid-February, and we regularly evaluate the cows' body condition scores. Over the years we have aggressively culled cows that did not appropriately maintain body weight during the winter, the result of which is a cow herd which is well suited for a winter of limited inputs.

During calving season, cows receive supplemental hay as mandated.

Our Calves...

As calves are born, they are transported with their dams to the particular pasture which will serve as the dam's breeding pasture for the subsequent breeding season. The calves will stay with their dams until early to mid-September, when all pairs are collected and transported to a common pasture. The calves are pre-conditioned (vaccinated for clostridial diseases “blackleg”, viral diseases [BVD, IBR, BRSV, PI3], vibrio, and leptospirosis) and branded. Heifers receive official calfhood vaccination (brucellosis), and bulls get their first round of footrot and pinkeye vaccine. At weaning three weeks later, the calves are weighed and given vaccination boosters. We practice fence line weaning, and it is then that calves are introduced to a ration of grain and free choice oat hay.

Our Veterinary Procedures...

Coming-2 year old bulls:

September 2013: pre-condition with the following vaccines: clostridials (“blackleg”), virals (BVD, BRSV, PI3, IBR), leptospirosis, vibrio, pinkeye, and footrot.

October 2013: weigh, separate from dams, booster vaccinations, deworm with ivermectin, tattoos

May 2014: Booster vaccinations, deworm with ivermectin, weigh

September 2014: Deworm with ivermectin, weigh

March 2015: Breeding Soundness Exam, vaccination boosters, deworm with ivermectin, weigh.

March 2015: Trichomonas testing*

*We test for trichomonas in order to comply with shipping regulations. Our herd has been closed since 2002, and these bulls have not been exposed to any females.

Coming Yearling Heifers:

September 2014: pre-condition with the following vaccines: clostridials (“blackleg”), virals (BVD, BRSV, PI3, IBR), leptospirosis, vibrio, official calfhood vaccination (brucellosis).

October 2014: weigh, separate from dams, booster vaccinations, deworm with ivermectin, tattoos

January 2015: deworm with ivermectin

March 2015: weigh, deworm with ivermectin, booster vaccinations (clostridials (“blackleg”), virals (BVD, BRSV, PI3, IBR), leptospirosis, vibrio)

Yearling Horses:

October 2014: Separate from dams

November 2014: Deworm with ivermectin, Coggins testing

January 2015: Deworm with ivermectin, vaccinations (EEE, WEE, tetanus, rabies)

February 2015: Booster EEE, WEE, tetanus

March 2015: Deworm with ivermectin

TO SHAVE OR NOT TO SHAVE – IS IT REALLY A QUESTION?

Early April on the High Plains can still witness old-man winter trying hard to maintain his wintery grasp. If sale date is like many early-Aprils past, attendants will be bundled appropriately to keep the chill out and the warmth in. The same will hold true for our animals.

We are in the business of producing the very best animals we can. Our breeding decisions are based on genetic potential. On sale day you will see our animals clean and well groomed – but not shaved, and certainly not torched! We are selling genetics – not a hair do! There is a reason animals have a hair coat, and the animals we sell will still wear it.

With our animals, hair coat is included – no additional charge!

OUR COMING YEARLING HEIFERS...

Our heifer calves are separated from their brothers at about 7 months of age. They remain in drylot and on a ration of grain and free choice oat hay until they are transported to their respective breeding pastures in early May.

As with our bulls, we don't push our heifers too hard, nutritionally speaking. Consistent with publically available studies, we have had success with heifers conceiving at 60% of their mature weight, and then conceiving the following year (with calf by side) for their second calves.

OUR HORSES...

Our goal in breeding horses is to produce an all-around ranch horse with good conformation and disposition. Another important goal is to help our kids gain experience.

Our stallion Zand Stone is a mild-mannered, easy-to-handle 15.2 hand perlino dun stallion with bloodlines from Two ID Bartender and Zan Parr Bar. He spends all year in the pasture: in summer he runs with the mares and foals, and in winter the entire remuda—riding horses as well as broodmares.

The pedigrees of our mares include Doc Bar, Poco Bueno, Peppy San Badger, Cutter Bill, and Two Eyed Jack.

Though we don't clip our cattle, we do own a set of clippers. All horses will be sold with a halter and a bridle path for it.

OUR HERD SIRES...

Over the years, we have refined the genetics we look for in our herd bull selection. Our current herd bull battery consists of the following: Buffalo Creek Orion W011 (known on our ranch as Giggles), Mushrush Impression X381 (known on our ranch as Ichabod), Andras In Focus 1158 (known on our ranch as Kibble). and LCS Z 6 (known on our ranch as Joe Bull).

All of our cows are bred by natural service, in segregated breeding pastures. Our herd bulls are released to their respective breeding herds on July 18 and retrieved August 29 (which produces a 42 day breeding season). The herd bulls are returned to the herd of pregnant cows in November or December, where they stay until shortly before calving season begins in late April.

OUR TEAM...

While ranching is a huge part of our lives, we are not only about livestock, hay, and fencing. All four kids participate in sports, piano, band, and perform as a singing group called The Cowboys & The Senoritas. Ask any of them to sing you a few bars from a Sons of the Pioneers tune!

Year-round, in all kinds of weather, Windell Clark spends his Saturdays (and sometimes other days) to keep the mechanical plant functioning. An excellent welder and mechanic, he even helps tamp in fence posts, in a pinch.

Nicholas P. Schroeder, DVM, MS, fondly known as Dr. Nick on our spread, is a retired veterinarian, Red Angus breeder, and good friend who helps us more than we know.

In summer, our crew also includes The Nephews, who come from Wyoming, Colorado, and Topeka, Kansas, and refer to their summer jobs as Ranch Boot Camp. Thanks Evan, Collin, Carter, Taylor, and "adopted" nephew, Dalton. Note from Nishi: I now feel qualified to cook for the Army.

Bernard at cross country meet

At Cheyenne Frontier Days last summer

Working men on the Giefer Ranch.

Ever wonder why the bulls in those photos look so intent? Here's what's going on in front of them.

Dr. Nick

Nishi & Wyndom pre-conditioning calves

Windell Clark

OUR LOCAL HISTORY...

The 1803 Louisiana Purchase, orchestrated by President Thomas Jefferson, merged into the United States the great expanse we now know as Western Kansas. In 1865, entrepreneurs seized an opportunity for trade with Denver City – on the western edge of what was then Kansas Territory – and established the Butterfield Overland Despatch (BOD) Trail. The BOD followed the Smoky Hill River to the Hackberry Creek (in modern-day Trego County), where Downer’s Station was built, and where the trail took a short deviation along the creek; an Indian raid later destroyed the station. Although the part of our ranch (affectionately called Dinosaur because of its many fossils) which includes the Smoky Hill River was bypassed by the route’s deviation, Castle Rock – a prominent landmark on the trail – can be seen in the background of some of our photos. And though the BOD didn’t cross our land, the WaKeeney-Dighton Stagecoach did – and (according to history) so did the famous George Armstrong Custer. Stagecoach ruts remain visible, and we have ridden horseback on the river bank where then-Lieutenant Custer and his cavalry troops trod.

Castle Rock in background

In 1877 business partners Albert Warren and James Keeney formed the Warren, Keeney & Co., and set about designing “The Queen City of the High Plains” – WaKeeney. The town was planned in a Chicago office, including the 80-foot wide streets for which we are grateful in this day of the automobile. Known today as “The Christmas City of the High Plains,” a 35-foot Christmas tree is decorated annually in the intersection of Main Street and Russell Avenue. Trego County – for which WaKeeney is the county seat – was organized in June of 1879, and named for Civil War Captain Edgar Poe Trego, of the 8th Kansas Division, who died in the 1863 Battle of Chickamauga.

The Kansas Pacific Railway reached WaKeeney in the 1870s. About a mile west of town, the crew building track came under Indian attack. History records that some of the crew fled northward and sought refuge under a cliff. Although the exact location is now unknown, we pasture the area, and our imagination is fueled as we ride by the cliffs and contemplate that these outcroppings – a serene scene for grazing cattle and horses, and even Christmas card photos – were once defensive positions for men engaged in the fight of their lives.

Area State historical sites include Old Fort Hays, Fort Wallace, and Cottonwood Ranch; National attractions are Ft. Larned and Nicodemus. Castle Rock and the Sternberg Museum (home to some of the aforementioned fossils) are also nearby. A little further northeast is the cabin where Dr. Brewster M. Higley in the early 1870s penned the words to a poem he titled “My Western Home” – which was set to music in 1947, and became the Kansas State Song we know as “Home on the Range.”

Oh, my – for those who travel this area and think it is just boring “flyover” country – what a rich history we have! This is why we are proud to call this Our Home on the Range of the Great American Plains!

SALE TERMS AND CONDITIONS...

TERMS: Terms of the sale are cash, check, or other terms agreed to in writing between seller, buyer, and sale manager payable immediately upon conclusion of the sale before animals will be moved. Sale Manager reserves the right to require a certified check as settlement before releasing any cattle.

PURCHASER'S RISK: All animals are the owner's risk prior to their sale and become property of the purchaser as soon as declared sold by the auctioneer.

BIDDING: Any disputes or challenges regarding bids or tie bids will be settled by the auctioneer and his decision will be final.

CERTIFICATE OF REGISTRY: A certificate of registry for each animal will be transferred to the buyer at the seller's expense.

ANNOUNCEMENTS: Any errors or changes in information contained in the catalog will be announced from the block and such announcements shall take precedence over the information contained herein.

HEALTH: All animals are eligible for interstate shipment. Interstate health papers prepared by an accredited veterinarian will be furnished on each animal sold. Arrangements for International Shipment should be made with the sale manager prior to the auction. All efforts for the exportation of cattle can be arranged through the sale manager.

LIABILITIES: All persons who attend the sale do so at their own risk. The seller, auction facility, and sale manager assume no liability for any accidents that may occur. Neither does the seller, auction facility, or sale manager assume liability for the loss or injury to livestock due to theft, mysterious disappearance, sickness, improper handling or Act of God. It is to be clearly understood that the sale manager and its representatives act only as a medium between the buyer and the seller. They are not responsible in any way for the failure on the part of the buyer and seller to live up to their obligations or for the truth of any warranties or representation, express or implied. Neither does the sale manager assume any financial obligations to collect or enforce collection of monies between parties. Any legal action, that may in exceptional cases be taken, must be between the buyer and the seller. This catalog has been prepared by the Sale Manager from pedigrees and information supplied by sources deemed reliable, however, the Sale Manager will in no way guarantee the pedigree, percentages of the animals selling, or data included in this catalog. Any exceptions taken are between the buyer and the seller.

CONTRACT: The above terms and conditions of sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction.

PHONE BIDS: Telephone bids will be taken by the sale manager. Kyle Gilchrist's cell number is (641) 919-1077.

Can't make the sale? Bid from home with DV Auction's "real-time" internet bidding service!

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab and watch our online bidding tutorial
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make you purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles? Call Tami at (308) 870-3661 or email tami@dvauction.com Our full-time support team can also always be reached at (402) 474-5557.

Red Angus Guide to EPDs

HB HerdBuilder Index – Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

GM GridMaster Index – If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

CED Calving Ease Direct – Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

BW Birth Weight – Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

WW Weaning Weight and **YW** Yearling Weight – Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

Milk Milk – Predicts differences in weaning weight of daughter's progeny due to milk production.

ME Maintenance Energy – Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

HPG Heifer Pregnancy – Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

CEM Calving Ease Maternal – Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

STAY Stayability – The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

MARB .. Marbling Score – Select bulls with high MARB EPD to increase the number of progeny that grade Choice or Prime.

YG Yield Grade – Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

CW Carcass Weight – Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

REA Rib Eye Area – Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

FAT Backfat – Need to reduce waste in carcasses? Select bulls with a low FAT EPD to reduce backfat, which favorably increases Yield Grade.

Ranch Tested. Rancher Trusted.

Red Angus
