Annual Production Sale

First Thursday of April
April 7, 2016

12 o'clock noon CDT
WaKeeney Livestock LLC
WaKeeney, Kansas

**Stout, Moderately Framed Coming Two-Year-Old Red Angus Bulls,
Yearling Red Angus Heifers, Yearling Quarter Horses & Two Ranch Broke Horses**

*Balanced Cattle Genetics Emphasizing Calving Ease, Reduced Maintenance Energy,
and Enhanced Stayability; Selected For Gentle Disposition*

A LITTLE ABOUT US

Our Philosophy...

We recognize that there is no “one size fits all” when it comes to seedstock. Because of this, we believe it is very important that you understand the approaches we take in our breeding program. We believe the cattle we have available for sale will work very well for many – but certainly not for all. We don’t want to simply make a sale – we want satisfied customers. It is for this reason that in the following pages, we have tried to do more than just describe the animals we have in this year’s offering.

Our Focus...

We began our purebred Red Angus herd in 1999 with the purchase of a bull and heifer. It is from that nucleus that our herd has been developed. We purchased some cows thereafter, but have maintained a closed cowherd since 2002.

Our initial focus was developing sound cattle, capable of surviving and thriving on the often limited inputs available on the High Plains. Selection pressure was applied to produce cattle with calving ease, low birth weight, and high longevity in the herd – meaning an EPD emphasis favoring high CED, low BW, and high STAY. Although not an early focus of our herd bull selections, we have also long applied pressure on maintenance energy, preferring a low ME EPD. The latter is simply a reflection of the environment in which our cattle live and conditions to which we subject our cows. For winter rations, our cows forage stock-piled grass until mid-February and are only fed supplemental hay from that point through calving. (In very rare instances of ice or extremely heavy snowfall, we do feed hay for brief periods before mid-February; however, those precipitation events are not common in our part of the country.) Since 2009, we have also applied selection pressure on the HPG and CEM EPDs, the results of which are now starting to become apparent.

We have emphasized these EPDs because we want a cow that will calve unassisted, forage for a significant portion of her nutritional needs, yet breed back to produce fertile progeny. In the process, we don’t overlook the other genetic traits, but we won’t pursue a high YW EPD, for example, if it were to come at the expense of any of our main areas of focus.

But there is no EPD for the most important trait for which we have selected – disposition. It is no understatement that we have been very meticulous in culling any cows which display aggression. Anyone who has had to weigh a newborn calf with the momma cow in one’s hip pocket will fully appreciate this sentiment. We have also found that quiet cows are just better for any scenario – whether it’s working them, loading them, or simply moving among them. University studies back us up on this. Flighty calves don’t gain as well in the feedlot.

We believe the selection criteria we employ will produce cattle that can survive and thrive on limited inputs.

Our Guarantee...

All bulls selling have passed a Breeding Soundness Examination within one month of sale. It is recommended that bulls be re-tested 4-6 weeks prior to breeding season. Bulls selling for \$4,000 or more are guaranteed through the first breeding season.

We strive to insure that all bulls we sell are sound breeders. However, as with any biological creature, deviations from expectations occur. We recognize that aberrations, although rare, are nonetheless part of the livestock industry. Therefore, we extend this breeding guarantee to purchasers of our bulls as a means of redressing those rare instances in which breeding expectations are not met.

1. All bulls sold are guaranteed to be breeders, with the exception of:
 - a. Bulls shown after sale by or with the permission of Buyer; in this instance, the breeding guarantee, if any, shall be as agreed upon between us and Buyer.
 - b. Negligence or willful misconduct on the part of Buyer.Any bull shall be considered a breeder if it: (1) Settles one-third or more of the healthy cows he serves; or (2) Is the sire of 20 or more calves; or (3) Settles cows by natural service and passes a fertility test made by a competent veterinarian during any six-month period of trial.
2. All claims for refund must be delivered by Buyer to us in writing prior to January 1, 2017.
3. In the event any bull is claimed to be a non-breeder, the bull must be returned to us in good condition and complying with Kansas health requirements. We shall be entitled to three (3) months trial following the return of the bull in which to prove the bull is a breeder. If at the end of three (3) months we are unable to prove the bull is a breeder, we shall refund to Buyer the purchase price, which shall be deemed full satisfaction and settlement. Any expenses incurred for transporting a bull claimed to be a non-breeder shall be the responsibility of Buyer. If we prove the bull to be a breeder, it shall be the obligation of Buyer to take delivery of the bull and pay all expenses incurred for transportation.

THIS IS A BREEDING GUARANTEE ONLY. THIS GUARANTEE DOES NOT EXTEND TO INJURY, ILLNESS, OR DEATH. INSURANCE FOR INJURY, ILLNESS, OR DEATH IS RECOMMENDED.

**All Red Angus cattle selling
in the sale are 1A 100%.**

Café, Tropical Mexican Restaurant, McDonald's, Subway, Dairy
Queen, Pizza Hut

Delivery: Sales aggregating over \$5,000 will be shipped free of
charge to a common address within 350 miles. Delivery beyond
that point will be at cost.

Discount: Sales aggregating over \$5,000 will be discounted \$250
if picked up day of sale.

Sale animals will be available for viewing at WaKeeney
Livestock LLC any time after 1 p.m. on April 6, 2016.

**Note...EPDs listed with each lot are
current as of catalog printing.**

Annual Production Sale

First Thursday of April

April 7, 2016

12 o'clock noon CDT

WaKeeney Livestock LLC
WaKeeney, Kansas

Welcome to the 2nd Annual Giefer Production Auction!

After last year's inaugural event, now we roll into year two and the "making of a program" as the Giefer family offer another functional set of 2 year-old bulls, yearling heifers, yearling horses and two ranch broke horses.

Last year the cattle were very well received and found new homes across the region with both commercial and seedstock producers. The Giefer cattle are raised in demanding prairie conditions with limited moisture and must survive and thrive on their own without extra inputs. For this reason, the Giefers have a very strict selection process when it comes to utilizing EPDs and the type and kind of cattle they produce. You will find their bulls very favorable for use on heifers and to produce maternal females that will thrive in any part of the country. Do not overlook the fact that these bulls have the added age advantage of virgin two year olds...not an easy commodity to find in today's Red Angus market. Also keep in mind that by April 7th, most of the bull sales are over, so do not put off coming to the auction or placing your bids by phone or the use of DVAuction.

Of all the auctions Lisa and I are involved with throughout the year, the Giefer program is truly one of the most family oriented operations with everyone involved and doing their part to make this a sensational Red Angus and horse event. If you cannot attend, please feel free to call me or any of the ringmen listed for an honest appraisal and representation of the animals selling. Also you may bid live during the auction with DVAuction. I will be in WaKeeney April 6th in order to evaluate the cattle and horses and will be available to answer any questions you may have.

We look forward to seeing you in WaKeeney, Kansas, April 7th!

Best Regards,

Kyle & Lisa Gilchrist

Our Cows...

Every cow and heifer in our herd has been raised on our ranch. The cowherd has been closed since 2002.

Our cows are bred to calve starting May 1 when pasture (generally) begins the summer growing season. We inevitably have early calvers, so for all practical purposes our cows begin calving around April 20. There are several reasons for selecting this time of year. First, daylight lasts longer to facilitate checking cattle. Second, the weather is generally kinder for weighing and tagging newborns. Third, by calving on clean grass, we virtually eliminate the prospect of calf scours. Finally, our grasses are at greatest production in mid-June—six weeks after calving. That is key because it is then that the cow is at peak lactation and resumes her estrous cycle to re-breed. In other words, she is at the highest nutritional demand of her year, and we try to pair that with the most optimal nutritional inputs.

As our cows calve, they are transported with their calves to what will be the cows' breeding pastures. We maintain separate breeding pastures for each of our herd bulls. We turn our bulls out July 18 – no exceptions; the day is eagerly anticipated, much like a holiday! We retrieve our bulls August 29, which results in a 42 day exposure for each cow. All of our cows are bred by natural service.

We generally strive to wean our calves mid-September to early October. At the time of weaning, our calves are fairly young – some just older than 100 days. Our calves are pre-conditioned 2 – 3 weeks prior to weaning, and we practice fence line weaning. It is at weaning that the cows are weighed, assessed a body condition score, hip height measured, dewormed, boosted (with clostridials “blackleg” and virals [BVD, BRSV, PI3, IBR], vibrio, and leptos), and pregnancy checked.

About a week after weaning (as the cows begin to accept that they have been separated from their calves), we transport the cows to another part of the ranch, where they forage until late November or early December. Our cows are then moved to their winter pasture where stockpiled pasture awaits and where they stay until just prior to calving season. Except in the rare instance of ice or very heavy snowfall, we avoid forage supplementation until mid-February, and we regularly evaluate the cows' body condition scores. Over the years we have aggressively culled cows that did not appropriately maintain body weight during the winter, the result of which is a cow herd which is well suited for a winter of limited inputs.

During calving season, cows receive supplemental hay as mandated.

Our Calves...

As calves are born, they are transported with their dams to the particular pasture which will serve as the dam's breeding pasture for the subsequent breeding season. The calves will stay with their dams until early to mid-September, when all pairs are collected and transported to a common pasture. The calves are pre-conditioned (vaccinated for clostridial diseases “blackleg”, viral diseases [BVD, IBR, BRSV, PI3], vibrio, and leptos) and branded. Heifers receive official calfhooed vaccination (brucellosis), and bulls get their first round of footrot and pinkeye vaccine. At weaning three weeks later, the calves are weighed and given vaccination boosters. We practice fence line weaning, and it is then that calves are introduced to a ration of grain and free choice oat hay.

Our Veterinary Procedures...

Coming-2 year old bulls:

September 2014: pre-condition with the following vaccines: clostridials (“blackleg”), virals (BVD, BRSV, PI3, IBR), leptos, vibrio, pinkeye, footrot
September 2014: weigh, separate from dams, booster vaccinations, deworm with ivermectin
February 2015: deworm with ivermectin, weigh
July 2015: deworm with ivermectin, weigh
January 2016: Vitamin A injection, deworm with ivermectin, weigh
February 2016: Booster vaccinations, deworm with ivermectin, weigh
March 2016: Breeding Soundness Exam, weigh, trichomonas testing*

*We test for trichomonas in order to comply with shipping regulations. Our herd has been closed since 2002, and these bulls have not been exposed to any females.

Coming Yearling Heifers:

September 2015: pre-condition with the following vaccines: clostridials (“blackleg”), virals (BVD, BRSV, PI3, IBR), leptos, vibrio, official calfhooed vaccination (brucellosis)
October 2015: weigh, separate from dams, booster vaccinations, deworm with ivermectin
December 2015: deworm with ivermectin, weigh
January 2016: Vitamin A injection, deworm with ivermectin, weigh

Yearling Horses:

August 2015: Separate from dams
September 2015: deworm with ivermectin, vaccinate rabies and EEE, WEE, tetanus
October 2015: booster EEE, WEE, tetanus
March 2016: deworm with moxidectin

Plug & Fancy:

March 2016: Deworm with ivermectin
Both have been vaccinated against rabies, EEE, WEE, and tetanus.

TO SHAVE OR NOT TO SHAVE – IS IT REALLY A QUESTION?

Early April on the High Plains can still witness old-man winter trying hard to maintain his wintry grasp. If sale date is like many early-Aprils past, attendants will be bundled appropriately to keep the chill out and the warmth in. The same will hold true for our animals.

We are in the business of producing the very best animals we can. Our breeding decisions are based on genetic potential. On sale day you will see our animals clean and well groomed – but not shaved, and certainly not torched! We are selling genetics – not a hair do! There is a reason animals have a hair coat, and the animals we sell will still wear it.

With our animals, hair coat is included – no additional charge!

OUR COMING YEARLING RED ANGUS HEIFERS...

EPDs IN CRISIS

OR...WHEN EPDS REALLY AREN'T

A year ago, two of our herd bulls carried reported EPDs (Expected Progeny Differences) much better than those the Red Angus Association of America (RAAA) data base shows as of the printing of this catalog. LCS Z6 had a HerdBuilder EPD of 188, now it's 122; a Calving Ease Maternal (CEM) EPD of 6, now it's 3; and a Stayability (STAY) EPD of 18 now it's 11. A more striking decline is noted with Andras In Focus, which sported a HerdBuilder of 177, now it's 60; CEM was 11, now it's 8; and STAY was 14, now it's 3. The prior EPDs were not accidents; they reflected the genetic pedigree we actively sought, and for which we expended considerable sums in acquiring. However, as the numbers show, these bull's EPDs as now reported by RAAA paint a much different – and uglier – picture. What's changed?

Let's start from this perspective: the bulls and their ancestry are no different now than they were a year ago. If anything, we can market the progeny of LCS Z6 and Andras In Focus with much more confidence because we have had the benefit of delivering and developing another year's worth of calves that have re-confirmed the decisions we made in adding them to our bull battery and introducing them into our cow herd's genetic pool.

The EPD difference appears to lie with the RAAA's inability to utilize ancestry and associated progeny information from black-hided animals who were registered with the Canadian Angus Association. (This is important because LCS Z6 and Andras In Focus each trace their bloodlines to some Black Angus in the Canadian registry.) The reasons for this data gap – at least to the extent we've been informed – appear to depend on who one talks to. Whatever the reason, the RAAA's currently published EPDs are most certainly inaccurate and, in some instances, wildly so. This is a source of immense frustration for us and other breeders and, in our view, threatens to severely undermine the utility and integrity of EPDs. The claim by some that "it's being worked on" is of little assurance to those of us who have bought in – literally and figuratively – to the promise of EPDs and outcross genetics.

The bottom line is this: despite the EPD crisis, the progeny of the mentioned bulls are genetically no different now than they were a year ago. We look forward to a resolution of the data problem, so the EPDs can return to what they should be.

OUR YEARLING QUARTER HORSES...

Our goal in breeding horses is to produce an all-around ranch horse with good conformation and disposition. Another important goal is to help our kids gain experience raising and handling foals.

Our stallion Zand Stone is a mild-mannered, easy-to-handle 15.2 hand perlino dun stallion with bloodlines from Two ID Bartender and Zan Parr Bar.

The pedigrees of our mares include Doc Bar, Poco Bueno, Peppy San Badger, Cutter Bill, and Two Eyed Jack.

Though we don't clip our cattle, we do own a set of clippers. All horses will be sold with a halter and a bridle path for it.

Fancy is a 14.1 hand AQHA mare who is easy to catch, saddle, load, clip, shoe, and ride. Safe for the littlest buckaroo in a small enclosure, she will carry any rider out in the pasture or down the road. Loves to work cattle, trail ride, and go to the local show. She's been there and done that and will go where you point her. Sound all around, she has a very small blue scar in her left eye that has been there for years and does not affect her vision.

Lot 57 PLUG

Non-Registered (Grade) | Age: ~20 years | Gelding

Sire: Unknown

Dam: Unknown

Color/Markings: Sorrel, star, roan strip, roan left hind half pastern

Fast walker, easy to catch, clip, shoe, load, saddle, and ride, he's been used in the pasture, arena, salebarn, show ring, and has traveled many miles down the road. At 14.3 hands, his registration papers have been lost, but he is a cowy Quarter Horse. No spook. Goes wherever you point him. We think he's about 20 years old. Sound all around. Perfect for a rider with a little experience. Would be a great mount for a kid who is graduating from a pony or for anyone who wants to cover a lot of country in a hurry.

SALE TERMS AND CONDITIONS...

TERMS: Terms of the sale are cash, check, or other terms agreed to in writing between seller, buyer, and sale manager payable immediately upon conclusion of the sale before animals will be moved. Sale Manager reserves the right to require a certified check as settlement before releasing any cattle.

PURCHASER'S RISK: All animals are the owner's risk prior to their sale and become property of the purchaser as soon as declared sold by the auctioneer.

BIDDING: Any disputes or challenges regarding bids or tie bids will be settled by the auctioneer and his decision will be final.

CERTIFICATE OF REGISTRY: A certificate of registry for each animal will be transferred to the buyer at the seller's expense.

ANNOUNCEMENTS: Any errors or changes in information contained in the catalog will be announced from the block and such announcements shall take precedence over the information contained herein.

HEALTH: All animals are eligible for interstate shipment. Interstate health papers prepared by an accredited veterinarian will be furnished on each animal sold. Arrangements for International Shipment should be made with the sale manager prior to the auction. All efforts for the exportation of cattle can be arranged through the sale manager.

LIABILITIES: All persons who attend the sale do so at their own risk. The seller, auction facility, and sale manager assume no liability for any accidents that may occur. Neither does the seller, auction facility, or sale manager assume liability for the loss or injury to livestock due to theft, mysterious disappearance, sickness, improper handling or Act of God. It is to be clearly understood that the sale manager and its representatives act only as a medium between the buyer and the seller. They are not responsible in any way for the failure on the part of the buyer and seller to live up to their obligations or for the truth of any warranties or representation, express or implied. Neither does the sale manager assume any financial obligations to collect or enforce collection of monies between parties. Any legal action, that may in exceptional cases be taken, must be between the buyer and the seller. This catalog has been prepared by the Sale Manager from pedigrees and information supplied by sources deemed reliable, however, the Sale Manager will in no way guarantee the pedigree, percentages of the animals selling, or data included in this catalog. Any exceptions taken are between the buyer and the seller.

CONTRACT: The above terms and conditions of sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction.

PHONE BIDS: Telephone bids will be taken by the sale manager. Kyle Gilchrist's cell number is (641) 919-1077.

OUR TEAM...

While ranching is a huge part of our lives, we are not only about livestock, hay, and fencing. All four kids are runners, often covering several miles before breakfast. They also participate in other sports, music, and scholars bowl.

Year-round, in all kinds of weather, Windell Clark spends his Saturdays (and sometimes other days) keeping the mechanical plant functioning.

Nicholas P. Schroeder, DVM, MS, fondly known as Dr. Nick on our spread, is a retired veterinarian, Red Angus breeder, and good friend who helps us more than we know.

Many thanks to Pat O'Dell and Elmer & Myrna Schlegel for editorial assistance and proofreading.

In summer, our crew includes The Nephews, who come from Eastern Kansas, Wyoming, and Colorado to toil at Ranch Boot Camp. Thanks Evan, Collin, Carter, Taylor, and "adopted" nephew, Dalton. No Sundays west of Omaha. Right, Boys?

OUR LOCAL HISTORY...

The 1803 Louisiana Purchase, orchestrated by President Thomas Jefferson, merged into the United States the great expanse we now know as Western Kansas. In 1865, entrepreneurs seized an opportunity for trade with Denver City – on the western edge of what was then Kansas Territory – and established the Butterfield Overland Despatch (BOD) Trail. The BOD followed the Smoky Hill River to the Hackberry Creek (in modern-day Trego County), where Downer’s Station was built, and where the trail took a short deviation along the creek; an Indian raid later destroyed the station. Although the part of our ranch (affectionately called Dinosaur because of its many fossils) which includes the Smoky Hill River was bypassed by the route’s deviation, Castle Rock – a prominent landmark on the trail – can be seen in the background of some of our photos. And though the BOD didn’t cross our land, the WaKeeney-Dighton Stagecoach did – and (according to history) so did the famous George Armstrong Custer. Stagecoach ruts remain visible, and we have ridden horseback on the river bank where then-Lieutenant Custer and his cavalry troops trod.

Castle Rock in background

In 1877 business partners Albert Warren and James Keeney formed the Warren, Keeney & Co., and set about designing “The Queen City of the High Plains” – WaKeeney. The town was planned in a Chicago office, including the 80-foot wide streets for which we are grateful in this day of the automobile. Known today as “The Christmas City of the High Plains,” a 35-foot Christmas tree is decorated annually in the intersection of Main Street and Russell Avenue. Trego County – for which WaKeeney is the county seat – was organized in June of 1879, and named for Civil War Captain Edgar Poe Trego, of the 8th Kansas Division, who died in the 1863 Battle of Chickamauga.

The Kansas Pacific Railway reached WaKeeney in the 1870s. About a mile west of town, the crew building track came under Indian attack. History records that some of the crew fled northward and sought refuge under a cliff. Although the exact location is now unknown, we pasture the area, and our imagination is fueled as we ride by the cliffs and contemplate that these outcroppings – a serene scene for grazing cattle and horses, and even Christmas card photos – were once defensive positions for men engaged in the fight of their lives.

Area State historical sites include Old Fort Hays, Fort Wallace, and Cottonwood Ranch; National attractions are Ft. Larned and Nicodemus. Castle Rock and the Sternberg Museum (home to some of the aforementioned fossils) are also nearby. A little further northeast is the cabin where Dr. Brewster M. Higley in the early 1870s penned the words to a poem he titled “My Western Home” – which was set to music in 1947, and became the Kansas State Song we know as “Home on the Range.”
