INTRODUCTION...

To our many repeat buyers, thank you for your continued patronage. To those considering our sale for the first time, thank you for your willingness to introduce Giefer Red Angus genetics into your herd.

We'd like to think we have learned a thing or two after more than two decades raising purebred Red Angus. Years ago, acting on a research article, we imposed a 42-day breeding season on our cows in the belief it would lead to an improvement in herd fertility; open (and supposedly less fertile) cows were culled. Recent research now indicates that, rather randomly, a fertile cow mated to a fertile bull mate results in a pregnancy that will "stick" 70% of the time. That means that over the course of a cows' cycle, you'd expect 70% of fertile, well-fed cows and heifers to become pregnant and stay pregnant, after two cycles 91%, after three cycles 96-97%, and so on. This is consistent with our findings. Based on these data, we have added a few days to the bulls' work schedules. We have also come to the conclusion that dried distiller's grain isn't what it's cracked up to be; after years of trying to find the fractional sweet spot in our ration, we gave up using it – with nearly immediately positive results in body condition score and hair coat quality. It seems the complete book on DDGs has yet to be written.

This will mark our third December sale. Having fewer bovine mouths to feed helps make winter feeding chores more manageable for us as our kids drift off to college and beyond. December also falls between cross country and track seasons, as opposed to our former sale date which was smack in the midst of track season! As many of you know, our kids have distinguished themselves as distance runners. All four won high school league championships and state medals, and many regional and four state championship medals have hung on our walls. A December sale frees us for travel to distant collegiate meets.

For you, a December sale presents an opportunity we cherished when we first started building a purebred herd: the ability to acquire age-advantaged bulls and very young heifers. One of the greatest health issues presented to breeders who sell yearling bulls is getting those bulls mature enough to pass a breeding soundness exam yet avoiding stress to the skeletal system and deposition of fat in the scrotum. We preferred to purchase long-yearling bulls that hadn't been raised like feeder cattle and young heifers that had time to fully integrate into our herd, under our conditions, well in advance of breeding. This has allowed us to offer you stock out of easy-keeping cows that thrive in our High Plains conditions. All of the cattle featured in this sale have been raised entirely on our ranch.

Our breeding emphasis will continue to prioritize calving ease, extended stayability, low maintenance energy requirements (in other words, superior herd builder genetics) and – most importantly – good disposition.

O come O come to our sale! We look forward to seeing you.

Merry Christmas!

OUR PHILOSOPHY...

We recognize that there is no “one size fits all” when it comes to seedstock. Because of this, we believe it is very important that you understand the approaches we take in our breeding program. We believe the cattle we have available for sale will work very well for many – but certainly not for all. We don’t want to simply make a sale – we want satisfied customers. It is for this reason that in the following pages, we have tried to do more than just describe the animals we have in this year’s offering.

OUR FOCUS...

We began our purebred Red Angus herd in 1999 with the purchase of a bull and heifer. It is from that nucleus that our herd has been developed. We purchased some cows thereafter but have maintained a closed cowherd since 2002.

Our first focus was developing sound cattle capable of surviving and thriving on the often limited inputs on the High Plains. Selection pressure was initially applied to produce cattle with calving ease, low birth weight, and high longevity in the herd – meaning an emphasis on expected progeny differences (EPDs) favoring high CED, low BW, and high STAY. Although not an early focus of our herd bull selections, we have also long applied pressure on maintenance energy, preferring a low ME EPD. The latter is simply a reflection of the environment in which our cattle live and conditions to which our cows are subjected. Since 2009 we have also applied selection pressure on the HPG and CEM EPDs, the results of which are now becoming apparent.

We have emphasized these EPDs because we want a cow that will calve unassisted and forage for a significant portion of her nutritional needs yet breed back to produce fertile progeny. In the process, we don’t overlook the other genetic traits, but we won’t pursue a high YW EPD, for example, if it were to come at the expense of any of our main areas of focus.

But there is no EPD for the most important trait for which we have selected – disposition. It is no understatement that we have been very meticulous in culling any cows displaying aggression. Anyone who has had to weigh a newborn calf with the momma cow in one’s hip pocket will fully appreciate this sentiment. We have also found that quiet cows are just better for any scenario – whether it’s working them, loading them, or simply moving among them. University studies back us up on this. Flighty calves don’t gain as well in the feedlot.

We believe the selection criteria we employ will produce cattle that can survive and thrive on limited inputs. We call this Prairie Proven Performance.

OUR CALVES...

Calves are preconditioned with vaccinations for clostridial diseases (blackleg), viral diseases (BVD, IBR, BRSV, PI3), vibriosis, leptospirosis, and pinkeye. In addition, the bulls are vaccinated against footrot, and the heifers receive official calthood vaccination (brucellosis).

OUR COWS...

Every cow and heifer in our herd has been raised on our ranch. The cowherd has been closed since 2002.

Our cows are bred to calve in late April through May. There are several reasons for selecting this time of year. First, daylight lasts longer to facilitate checking cattle. Second, the weather is usually kinder (although we will long remember the late-April blizzard of 2017) for weighing and tagging newborns. Third, calving on clean grass virtually eliminates the prospect of calf scours. Finally, our grasses are at greatest production in mid-June—six weeks after calving which coincides with a cow's peak lactation and fully resuming her estrous cycle. In other words, we try to pair the highest nutritional demand of her year with the most optimal nutritional inputs.

We maintain separate breeding pastures for each herd bull and turn bulls out July 18 – no exceptions; the day is an eagerly anticipated holiday on the Giefer Ranch! We retrieve bulls in mid-September, resulting in a 50-day exposure for each cow. In 2016, we began an artificial insemination program for heifers.

Calves are separated in late summer while cows remain on pasture until late November. The cows are weighed, assessed a body condition score, hip height measured, dewormed, boosted (with clostridials [blackleg] and virals [BVD, BRSV, PI3, IBR], vibrio, and leptospirosis), and pregnancy checked on their way to winter pasture where stockpiled pasture awaits and where they stay until just prior to calving season. Except in the rare instance of ice or very heavy snowfall, we avoid forage supplementation until mid-February. Cows' body condition scores are regularly determined. Over the years we have aggressively culled cows that did not appropriately maintain body weight during the winter, the result of which is a cow herd well suited for a winter of limited inputs.

During calving season, cows receive supplemental hay as mandated.

OUR LONG YEARLING BULLS...

Our bull calves are separated from their sisters at about 7 months of age. They are then released into a sizeable trap where they have room to roam and exercise. The bulls are wintered on a ration of grain and free choice hay.

In spring, they are weighed, receive vaccination boosters, and are thoroughly evaluated for soundness. Abnormalities are culled. The bulls spend summer on pasture and/or drylot, as conditions warrant. The bulls are returned to the trap in the fall.

We don't push our bulls hard. Because our cows calve in May, the bulls, as yearlings, would be too young to sell in a spring sale as coming yearlings. Further, studies we have reviewed suggest that raising bulls on a moderate nutritional plane may increase their breeding lifetime because of two important results: (1) they don't "outgrow" their feet and legs in their developmental stage, and (2) they deposit less scrotal fat, which appears to contribute to improved semen production.

A NOTE ON TRICHOMONIASIS TESTING

The Kansas Department of Agriculture's Division of Animal Health has approved Giefer Ranch's Trichomoniasis Herd Management Plan. To gain this certification, we submitted information regarding our fences, herd movements, individual identification, and the virgin status of our sale bulls (we do not lease any bulls). By granting this status, the State allows us to market and ship (within Kansas) any bulls under 24 months of age without testing for Trichomoniasis.

Trichomoniasis is a sexually transmitted cattle disease that causes early term abortion in cows. These abortions occur early enough in pregnancy that the fetus is generally resorbed rather than expelled, so the dead fetus will not likely be found. The cow may become pregnant again later in the breeding season. Often the first sign of infection in the herd is a large number of late and open cows at preg-checking time.

Though the cow can clear the infection, a bull cannot. The protozoa that cause trichomoniasis "hide" in the many folds inside the bull's penile sheath and are impossible to fully eliminate. The only "cure" for trichomoniasis in a bull is slaughter.

Testing a bull for trichomoniasis involves sampling the smegma found in the penile sheath. Conducting the test does incur some risk of damage to the sheath and penis. Because of this we have elected against routinely testing sale bulls. However, if you require a trichomoniasis test to ship outside Kansas, or if you are within Kansas and desire your bull purchase(s) tested, please let us know on sale day and allow us a couple weeks after the sale to complete the testing (at our cost). If testing is requested, we will board your bull(s) free of charge if they are picked up within two weeks of the sale.

OUR WEANLING HEIFERS...

Here are some of the best of the best HerdBuilder prospects we have to offer. Lots 36A through 42B will come into the sale ring in pairs. High bidder earns the privilege of picking which one gets to join his or her breeding herd while the remaining heifer will be warmly welcomed into ours!

BECAUSE OF THE MANY ENVIRONMENTAL AND OPERATIONAL FACTORS WHICH BEAR ON HEIFER PREGNANCY – AND WHICH ARE BEYOND OUR CONTROL – THESE HEIFERS SELL AS IS, WHERE IS, WITH NO BREEDING GUARANTEE.

SALE LOTS...

For buyers' convenience, the bull lots are arranged by sire. Lots 1-7 are by BECKTON JULIAN B139. Lots 8-10 are by GIEFER OCTANT H553. Lots 11-16 are by BECKTON NEW ERA D206. Lots 17-23 are by GIEFER JUXTAPOSITION D591. And lots 24 and 25 are by 5L INDEPENDENCE 560-298Y

**ALL CATTLE SELLING ARE 100% RED ANGUS
EPDs listed with each lot are current as of November 10, 2021**

DELIVERY:

Purchasers, please make arrangements for transportation of your purchase(s). If you will be shipping on day of sale, please bring a trailer. Boarding (except for purposes of testing--see Trichomoniasis Testing) will be assessed a daily charge if purchase(s) are not picked up within three days of sale.

Please Note:

The AQHA transfer fee will be added to the purchase price of the horse. As always, all Red Angus transfers are free.

Sale animals will be available for viewing at WaKeeney Livestock, LLC, any time after 1 p.m. on December 8, 2021.

View this catalog online at GieferRanch.com and www.redcows.net

OUR GUARANTEE...

All bulls selling have passed a Breeding Soundness Examination within one month of sale. It is recommended that bulls be re-tested 4-6 weeks prior to breeding season. Bulls selling for \$4,000 or more are guaranteed through the first breeding season.

We strive to insure that all bulls we sell are sound breeders. However, as with any biological creature, deviations from expectations occur. We recognize that aberrations, although rare, are nonetheless part of the livestock industry. Therefore, we extend this breeding guarantee to purchasers of our bulls as a means of redressing those rare instances in which breeding expectations are not met.

1. All bulls sold are guaranteed to be breeders, with the exception of:
 - a. Bulls shown after sale by or with the permission of Buyer; in this instance, the breeding guarantee, if any, shall be as agreed upon between us and Buyer.
 - b. Negligence or willful misconduct on the part of Buyer.
 - c. Any bull shall be considered a breeder if it:
 - (1) Settles one-third or more of the healthy cows he serves; or
 - (2) Is the sire of 20 or more calves; or
 - (3) Settles cows by natural service and passes a fertility test made by a competent veterinarian during any six-month period of trial.
2. All claims for refund must be delivered by Buyer to us within twelve months of purchase.
3. If any bull is claimed to be a non-breeder, then the bull must be returned to us in good condition and complying with Kansas health requirements. We shall be entitled to three (3) months trial following the return of the bull in which to prove the bull is a breeder. If at the end of three (3) months we are unable to prove the bull is a breeder, then we shall refund to Buyer the purchase price, which shall be deemed full satisfaction and settlement. Any expenses incurred for transporting a bull claimed to be a non-breeder shall be the responsibility of Buyer. If we prove the bull to be a breeder, then it shall be the obligation of Buyer to take delivery of the bull and pay all expenses incurred for transportation.

THIS IS A BREEDING GUARANTEE ONLY.
THIS GUARANTEE DOES NOT EXTEND TO INJURY, ILLNESS, OR DEATH.
INSURANCE FOR INJURY, ILLNESS, OR DEATH IS RECOMMENDED.

OUR HORSES...

We were excited to learn that 2017 Zand Stone progeny GQ Bandana Te Dude “Diesel” from our program sold at the 2021 Congress Ranch Horse Sale for \$27,000! His brother GQ Bartender Check also has outstanding conformation, great buckskin color, and excellent ground manners. Floor price \$1000. AQHA transfer fee will be added to purchase price. Bring your AQHA membership number if you have one.

Veterinary procedures for weanling horses are as follows:

August: Weaned, dewormed (Bimectin), vaccinated against Eastern, Western, and Venezuelan Encephalomyelitis, tetanus, and rabies.

September: Dewormed (Panacur), boosters for EEE/WEE/VEE/tetanus.

November: Dewormed (Bimectin)

OUR DOGS...

After considerable research into stock dogs, we selected English shepherds for their work ethic, easy-care coat, and family friendliness. They are invaluable helpers when moving cattle from place to place—having Bard on a trail drive is worth three people horseback.

Rat terriers are known for being great varmint killers and remarkably loyal companions. And don't let their small size fool you—when it's time to go in the pickup, they have no trouble jumping right in! While all the puppies we've raised have ended up living indoors, our rat terriers live outside exclusively and do just fine in any kind of weather. Watch our website www.GieferRanch.com and Facebook page Giefer Ranch for information about future litters.

SALE TERMS AND CONDITIONS...

TERMS: Terms of the sale are cash, check, or other terms agreed to in writing between seller and buyer, payable immediately upon conclusion of the sale before animals will be moved. Seller reserves the right to require a certified check as settlement before releasing any livestock.

PURCHASER'S RISK: All animals are the owner's risk prior to their sale and become property of the purchaser as soon as declared sold by the auctioneer.

BIDDING: Any disputes or challenges regarding bids or tie bids will be settled by the auctioneer and his decision will be final.

CERTIFICATE OF REGISTRY: A certificate to registry for all cattle will be transferred to the buyer at the seller's expense.

ANNOUNCEMENTS: Any errors or changes in information contained in the catalog will be announced from the block and such announcements shall take precedence over the information contained herein.

HEALTH: All animals are eligible for interstate shipment. Interstate health papers prepared by an accredited veterinarian can be furnished on each animal sold. All efforts for the exportation of livestock can be arranged through the seller.

LIABILITIES: All persons who attend the sale do so at their own risk. The seller and auction facility assume no liability for any accidents that may occur. Neither does the seller or auction facility assume liability for the loss or injury to livestock due to theft, mysterious disappearance, sickness, improper handling, or Act of God. Any legal action that may in exceptional cases be taken must be between the buyer and the seller. This catalog has been prepared by the seller from pedigrees and information supplied by sources deemed reliable; however, the seller will in no way guarantee the pedigree, percentages of the animal selling, or data included in this catalog. Any exceptions taken are between the buyer and the seller.

CONTRACT: The above terms and conditions of sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction.

PHONE BIDS: Telephone bids will be taken by the auctioneer. Kyle Gilchrist's cell number is (641) 919-1077.

OUR LOCAL HISTORY...

The 1803 Louisiana Purchase, orchestrated by President Thomas Jefferson, merged into the United States the great expanse we now know as Western Kansas. In 1865, entrepreneurs seized an opportunity for trade with Denver City – on the western edge of what was then Kansas Territory – and established the Butterfield Overland Despatch (BOD) Trail. The BOD followed the Smoky Hill River to the Hackberry Creek (in modern-day Trego County), where Downer's Station was built, and where the trail took a short deviation along the creek; an Indian raid later destroyed the station. Although the part of our ranch (affectionately called Dinosaur because of its many fossils) which includes the Smoky Hill River was bypassed by the route's deviation, Castle Rock – a prominent landmark on the trail – can be seen in the background of some of our photos. And though the BOD didn't cross our land, the WaKeeney-Dighton Stagecoach did – and (according to history) so did the famous George Armstrong Custer. Stagecoach ruts remain visible, and we have ridden horseback on the river bank where then-Lieutenant Custer and his cavalry troops trod.

In 1877 business partners Albert Warren and James Keeney formed the Warren, Keeney & Co., and set about designing “The Queen City of the High Plains” – WaKeeney. The town was planned in a Chicago office, including the 80-foot wide streets for which we are grateful in this day of the automobile. Known today as “The Christmas City of the High Plains,” a 35-foot Christmas tree is decorated annually in the intersection of Main Street and Russell Avenue. Trego County – for which WaKeeney is the county seat – was organized in June of 1879, and named for Civil War Captain Edgar Poe Trego, of the 8th Kansas Division, who died in the 1863 Battle of Chickamauga.

The Kansas Pacific Railway reached WaKeeney in the 1870s. About a mile west of town, the crew building track came under Indian attack. History records that some of the crew fled northward and sought refuge under a cliff. Although the exact location is now unknown, we pasture the area, and our imagination is fueled as we ride by the cliffs and contemplate that these outcroppings – a serene scene for grazing cattle and horses, and even Christmas card photos – were once defensive positions for men engaged in the fight of their lives.

Area State historical sites include Old Fort Hays, Fort Wallace, and Cottonwood Ranch; National attractions are Ft. Larned and Nicodemus. Castle Rock and the Sternberg Museum (home to some of the aforementioned fossils) are also nearby. A little further northeast is the cabin where Dr. Brewster M. Higley in the early 1870s penned the words to a poem he titled “My Western Home” – which was set to music in 1947, and became the Kansas State Song we know as “Home on the Range.”

Oh, my – for those who travel this area and think it is just boring “flyover” country – what a rich history we have! This is why we are proud to call this Our Home on the Range of the Great American Plains!
